Abstract of **JP2002053444**

PROBLEM TO BE SOLVED: To provide a conditioning agent composition which does not cause a sticky touch just after used and can highly persistently impart excellent touches such as excellent smoothness and excellent moist touch to hair after dried. SOLUTION: This conditioning agent composition contains the following components (A), (B) and (C): (A) a cationic surfactant, (B) a fatty alcohol or a fatty acid, and (C) an organopolysiloxane which has a silicone segment content of ≥ 40 wt.% and has one or more silicon atoms each bound to an alkylene group containing a nitrogen atom and poly-(N-acylalkylimine) units represented by the general formula (1) [(a) is the number of 1 to 5; R1 is H, a 1 to 12C alkyl, a cycloalkyl, an aralkyl or an aryl].
